

Reed diffusers or other fragrance dispersers are an ideal addition to your home, office or elsewhere; allowing you to add constant fragrance without the need for flame or heat. The reeds in a diffuser or the corks in a car freshener soak up the fragranced oil and disperse the scent into the air. Our diffusers and fresheners will last until all of the fragrance oil evaporates which is dependent on size. Reed diffusers typically last for around 10-12 weeks depending on the temperature of the room and placement of the diffuser. To maintain your diffuser or freshener and keep your space fragranced for longer we recommend following our handy care instructions below:

1. To use remove the cap and stopper, replace the cap and insert the reeds (if using a diffuser). If you're using our diffuser refills then take care when pouring into your diffuser bottle, use gloves and a funnel or a pouring jug. Wipe any drips or spillages immediately!
2. Place your reed diffuser where people pass by throughout the day, this encourages air circulation and lifts the fragrance. Car fresheners can be hung from the rear-view mirror using the attached cord or placed in a compatible car vent with the optional clip.
3. If you like a fuller fragrance use more reeds, for a lighter fragrance use fewer reeds. Flip the reeds to freshen the fragrance and take care not to spill the oil. Use gloves when handling reeds! Car fresheners can be carefully tipped to ensure the internal cork is soaked in the fragrance oil.
4. Do not place your diffuser or freshener directly on polished or painted surfaces, use a coaster or mat to avoid damage to furnishings from accidental spillages.
5. Do not light the reeds! Do not ingest! Keep out of reach of children and pets!

Thank you for your purchase!
